

# FENCING panels

Fencing panels are a very flexible and functional system chosen by both institutional and individual Customers. They lend a very nice and complete look to the property. Panel fencing is characterized by a long service life and resistance to atmospheric conditions. The panel fencing offered by METALURGIA SA is made of galvanized wires, in which the zinc coating constitutes the main anti-corrosive protection. A layer which additionally protects panels against aggressive environmental conditions is a powder coating whose color and shine give the fencing an esthetic appearance. A big advantage of panel fencing is its easy and fast installation as well as a possibility of incorporating it in such products as concrete, stone or brick.

Panel height	1230 mm	1530 mm	1730 mm
Panel width	2500 mm		
Number of bends	2	3	3
Mesh size	55 x 200 mm		
Wire diameter	4/4 mm		
Post height	2000 mm	2200 mm	2400 mm
Post cross-section	40 mm x 60 mm		
Number of brackets	2	3	3
Finish	galvanized wire / powder coating		
Color palette	RAL 6005; RAL 7016		

The above-presented table contains a standard offer of panel fencing. Other types and dimensions can be individually arranged with the Sales Department of METALURGIA SA.

We have been specializing in manufacturing of wires and wire products for more than 135 years, following the trends and taking into account our customers' suggestions. We are the leader in galvanized wire production on the Polish market. Since 2009 we have been part of TRINECKÉ ŽELEZÁRNY- MORAVIA STEEL Group. Our strong brand and product quality appreciated by customers is the result of our special attention paid to every detail of the production process. By investing in highly qualified engineering and technical staff, we ensure a high level of after-sale, technological and marketing service. The backbone of our manufacturing base is composed of: an efficient wire rod pickling line, a modern dip wire galvanization line, wire and wire rods recrystallization and spheroidization furnace, modern drawing base and many other types of equipment for wire processing. Our products are successfully placed on numerous foreign markets. We also implement different innovation and development projects - steel wires with TRIP effect. Our manufacturing processes are compliant with the wide range of applicable industry standards, as well as individual needs of our customer.

In our broad selection of products you will also find:

**bare hard wires, semi-hard wires and soft (black annealed) wires**  
**galvanized wires**  
**PVC coated wires**  
**barbed wires**  
**copper coated wires**  
**welding wires**  
**bookbinding wires**  
**nails – in one of the broadest assortment range in the world**  
**rods**  
**knotted wire netting**  
**heat treatment services of wires and wire rods**  
**surface treatment services of wires and wire rods**

All products meet the requirements of the highest quality standards which is confirmed by the ISO 9001:2008 certificate
